STAUFF Valves

STAUFF Test

STAUFF Line
Components
For more than 50 years, the companies of STAUFF Group have been developing, manufacturing and distributing pipework equipment and hydraulic components for mechanical and plant engineering and for service and industrial maintenance.

In addition to mobile and industrial hydraulic machinery, typical applications also include commercial and special purpose vehicles, rail transportation and energy technology. Likewise, STAUFF products are used in marine, oil and gas applications and in the process, food and chemical industries.

The overall range currently includes about 40,000 standard products as well as numerous special and system solutions according to customer’s specifications or based on our in-house development.

All STAUFF products undergo relevant testing in accordance with international regulations and are governed by the high standards of the in-house quality management system. Furthermore, many items have received certifications and approvals from various international institutes, organisations and authorities who have independently confirmed the quality and performance of the products.

Wholly-owned manufacturing, sales and service facilities in 18 countries and a tight global network of authorised distribution partners ensure high presence and service paired with a maximum of availability.

With the seven dedicated STAUFF Line product groups

• STAUFF Clamps
• STAUFF Connect
• STAUFF Flanges
• STAUFF Hose Connectors
• STAUFF Quick Release Couplings
• STAUFF Valves
• STAUFF Test

from own, in-house development and manufacturing, the companies of the STAUFF Group provide a comprehensive range of components for fastening and connecting pipes, tubes and hoses for mobile and industrial hydraulic applications and many other industries.

The portfolio is completed by components for shutting-off, regulating, throttling and measuring fluid media.

In order to perfectly match each other, STAUFF Line products are designed and offered on a high, uniform level of quality. A large proportion of the range made from steel comes as standard with the premium STAUFF Zinc/Nickel surface coating, which is also optionally available for many of the other components.

This coating offers the most reliable surface protection far beyond the previous market standards – even after transport, handling and assembly of the components – and meets all current legal requirements.

If desired, Original Equipment Manufacturers can be supported with value-added services, from technical consultation to pre-assembly, assembly and kitting as well as logistics services:

• Support with the selection of suitable standard components and ordering options; provision of customised solutions according to customer’s specifications or based on our in-house development – from prototyping to large scale production

• Analysis and optimization of existing and design and developments of new systems aimed at increasing the efficiency and performance of machines and equipment and creating value for customers by reducing the total cost

• Pre-assembly, assembly and kitting of individual components to customer-specific system modules

• Individually coordinated procurement solutions (e.g. web shop and electronic data interchange) and supply models (e.g. from warehousing of customised components to Kanban logistics and just-in-time delivery of pre-fabricated system modules to the assembly lines of the customers) aimed at optimising material flows
STAUFF Clamps

Components and systems for the installation of pipes, tubes, hoses, cables and other components

- Block Clamps in the Standard, Heavy and Twin Series according to DIN 3015
- Heavy Twin Series
- STAUFF ACT Clamps: Anti-Corrosion Technology
- STAUFF SWG: Stud Welding System
- STAUFF Bond: Adhesive Bonded Fastening
- Custom-Designed Special Clamps
- Light Series Clamps
- Saddle Clamps
- Flat Steel and Round Steel U-Bolt Clamps
- Metal DIN Clamps
- Construction Series

STAUFF Connect

Metric tube connectors and accessories according to ISO and DIN: Assembly machines, tools and devices

- 24° Cutting Ring Fittings
- 24° Taper Fittings with O-ring
- 24° Weld Cones with O-ring
- 37° Flared Tube Fittings
- STAUFF Form Tube Forming System
- Check and Alternating Valves
- Assembly Tools and Devices
STAUFF Flanges

Singe- and multi-part four-bolt flange connections according to ISO and SAE; Gear pump flanges
- SAE Split Flange Halves / Flange Clamps
- SAE Flange / Counterflange Adaptors
- SAE Single-Part Flanges / Counterflanges
- Accessories for SAE Flanges
- SAE Flange Blocks
- Gear Pump Flanges

STAUFF Hose Connectors

Hose inserts and swage ferrules for all hose types commonly used in hydraulic applications
- Carbon Steel Hose Connectors
- Hose Connectors with Interlocking Protection
- Stainless Steel Hose Connectors
- High-Pressure Carbon Steel Hose Connectors
- High-Pressure High-Performance Steel Hose Connectors
- Test Mandrels and Mandrel Kits
STAUFF Quick Release Couplings

Push-to-connect, screw-to-connect and multi couplings to connect and disconnect hydraulic lines

- Push-to-Connect Couplings
- Push-to-Connect Couplings made of Stainless Steel
- Push-to-Connect Couplings made of Brass
- Multi Couplings
- Screw-to-Connect Couplings
- Screw-to-Connect Couplings made of Stainless Steel
- Plastic Construction Couplings
- Special Applications

STAUFF Valves

Manually operated ball valves as well as flow control valves for shutting off, regulating and throttling fluid media

- Two-Way Ball Valves (Block Body, Forged Body and Round Body)
- Three-Way- and Four-Way Ball Valves
- Flow Control Valves
- Gauge Isolator Valves (Single Station / Multi Station)
- Special Application Valves
STAUFF Line Components

Test Couplings, test hoses and accessories for pressure monitoring, system venting and obtaining of fluid samples

- Male Stud Test Couplings
- Test Couplings with Tube Connector (ISO/DIN/JIC/ORFS)
- Bulkhead Test Couplings
- Test Hoses and Connectors

- Test Adaptors
- Pressure Gauge Adaptors and Accessories
- Special Test Coupling Solutions

STAUFF Test

Aligned with the needs of the market, the product groups

- STAUFF Test
- STAUFF Diagtronics
- STAUFF Filtration Technology
- STAUFF Hydraulic Accessories

include a comprehensive range of analogue and digital measuring equipment and devices, filtration systems and replacement filter elements as well as accessories for the construction of tanks, reservoirs, power packs and gear boxes in mobile and industrial hydraulics.

The offer is completed by relevant value-added services:

- Support with the selection of suitable components and ordering options; provision of customised solutions according to customer’s specifications or based on our in-house development – from prototyping to large scale production
- Analysis of existing hydraulic circuits aimed at filtration systems, tank components and monitoring devices that perfectly match to the specific requirements, and developing integrated concepts to increase the efficiency and performance of machines and equipment
- Individually coordinated procurement solutions and supply models

STAUFF System and Reservoir Components
Global Contact Directory

STAUFF products and services are globally available through wholly-owned subsidiaries and a tight network of authorised distributors and representatives in all major industrial regions of the world.

Contact information on this page may be subject to changes and additions over time. Frequently updated and complete contact information can always be found at www.stauff.com.
